

Premier Support

Get the personalised support you need to achieve your CX goals

If you have a complex CX stack with customised development and are in a business that operates 24/7 or is growing rapidly, you need dedicated specialists on call who are experts in your specific Zendesk instance. With Premier Support, you can expect peace of mind through enterprise-grade technical support that fits your business needs. It's the **maximum level of partnership** with the Zendesk Advocacy Team, and it empowers you to:

Provide superior experiences to your customers and users

Sail smoothly on your omnichannel journey

Scale and make changes with a safety net

With Premier Support, you get:

Personal Support Engineer

Personalised technical support from a designated engineer who is an expert in your Zendesk instance and CX stack

Dedicated routing

Direct routing of requests to your Personal Support Engineer and the Premier Support Team

Developer support

Hands-on app and API support for your developers as you grow and extend your usage

24/7 proactive monitoring

Support, outreach, and resolution guidance when something isn't right

Monthly health checks

Ability to review your experience, tickets, and engagement with the team

Priority service

99.9% uptime and a 30-minute continuous reply time commitment for critical issues

"Rather than being just customer number 5, we can actually contact people at Zendesk whenever we have an issue. We're starting to see the results of cultivating that human aspect."

– John Turner

Business Solutions Manager at Mailchimp

Which level of service is right for you?
